Profile

I am a highly motivated self-learner software developer with experience in developing a wide range of web applications and software. My core experience is on building front-end applications using HTML, CSS, JavaScript and React. Furthermore, I have developed various automated applications using Python to reduce repetitive and time-consuming tasks. I am currently seeking to be a frontend developer where I can apply my knowledge and further develop my skills.

Skills

- Proficient: HTML | CSS | JavaScript (ES6+) | React (Hooks, Router V6)
- Familiar: Python

Projects

- React Responsive Portfolio Website (HTML5, CSS3, React)   https://yingluoresume.com
  - Developed the Frontend UI with React with a responsive gallery and sliding carousel.
  - Enabled visitors to download my CV and contact me via Email and WhatsApp.

- To-Do List web app (HTML5, CSS3, React)   http://todolist.yingluoresume.com
  - Built a responsive To-Do app using React Hooks and using modern CSS features (e.g flexbox) for dynamic props based styling.
  - Enabled users to add, edit, delete, clear and complete tasks.
  - Utilized EmailJS to allow users to send their To-Do list to their emails.

- Github Profile Search app (HTML5, CSS3, React, Axios)   http://githubsearch.yingluoresume.com
  - Built a GitHub Profile Search app with React to allow users to search for information from GitHub.
  - Used GitHub API to pull user's information (e.g. avatar, name, profile) .

- Cryptocurrency Price Alert program (Python)
- Github Profile Search app (HTML5, CSS3, React, Axios)   https://github.com/yingluo1020/Crypto-Alert
  - Created a python script that tracks the current price of any cryptocurrency using "cryptocompare" library.
  - Alert the user if specific actions are triggered (e.g. price target limit).
